**Abstract.** This article provides information about the formation of jewelry names in English and their importance in the English lexicon.

**Keywords:** Jewelry, durable jewelry, necklaces, earrings, bracelets.

In this article, the names of jewelry in English are analyzed semantically, and they are divided into groups according to which part of the body they are worn. As a result of research, we have identified and analyzed the names of jewelry belonging to the following groups:

Names of jewelry classified according to body parts:

For the head: headdress, headband, hat pin, hair pin, hair ring, pledge pin, crown, coronet, tiara, diadem, aigrette

For lips: labret, lip rings

For the nose: Nose ring

For ears: earring, earplug, ear cuff, ear thread

For teeth:

For the neck: necklace, choker, pendant

For the chest: pectoral

For the elbow: armlet, torc

For wrists: wristlet, bracelet, bangle

For hands:

For fingers:

For the heel:

For legs:

Head ornaments, headwear:

Crown

It is not known exactly who was crowned first, but there is a lot of evidence that Egyptian pharaohs were crowned. Their depiction of deities also shows deities wearing crowns. Crowns worn by Egyptian kings symbolically connected royalty to the gods.

The earliest crowns found by archaeologists had a relatively simple design. Basically, these were simple circles of gold or silver decorated with precious stones. However, Egyptian art shows that these crowns were also decorated with feathers, which added height and decoration to the design.

The Egyptians created several different types of crowns in different styles ring.

A ring is a decoration of the head, it can also be called a diadem. Tiaras have traditionally been used as a word for a crown or the base of a crown. They are similar to the open crowns without belts and used by the heirs to the throne.

### The story

They were recorded in Greek times when poor people in society often wore them in public. Tiaras were often called stephanos, i.e. laurel wreath.

### Crown

A tiara is a type of crown worn by nobles rather than kings and queens. However, to many, the crown is very similar to any crown a royal might wear. It is a round head ornament, usually made of gold, decorated with pearls and leaf motifs.

In Great Britain, the type of design used to decorate a crown indicates the rank of the wearer. For example, according to the Encyclopaedia Britannica, a Duke's crown consists of eight strawberry petals.

### Tiara

The design of the tiara belongs to the kings of Persia. A tiara is a circle with at least one high peak. However, there are many different styles of tiaras.

The bandeau tiara is an old-fashioned design that has seen a recent resurgence in popularity. It looks a bit like a stylized headband, with a thick, ornate front, usually set with diamonds. It usually has the same height along its entire length or narrows slightly towards the central point.

Bandeau is an open model worn on top of the head. It can be worn under the forehead or sit on the back.

One of the most popular tiara styles is the kokoshnik, a Russian-style tiara that has seen a resurgence of popularity in modern times. This is a traditional Russian headdress sitting on the head and high on the forehead. This style has a wide design that tapers from a central point at the top.

This cone design is made of diamond or continuous chevron shaped branches. This style of tiara is very popular among the British royal family.

Tiara is traditionally worn by women as a decorative piece. They are only worn on formal occasions when there is a white tie dress code. In ancient times, they were worn to signify high status, especially by kings during the Persian period.

Tiaras are an important part of British history. Queen Elizabeth II is known to have the largest and most expensive collection of tiaras in history. Tiaras have always been associated with royalty, but are now often worn by non-royals at formal events and parties.

### Earrings

Earrings have been around since the Bronze Age. The oldest evidence of earrings ever found is about 5000 years old. Hoop earrings were popular 4000 years ago.

Persian soldiers wore them as protective talismans during battle. These ancient earrings are usually made of gold and decorated with precious stones. In Egypt, earrings were so popular that even cats wore them.

Tutankhamun's ears had many holes for earrings, and Cleopatra wore a pair of pearl earrings.

### The story

In the 1900s, earrings became more fashionable than ever with the invention of clip-on

and screw-on designs. This allowed people without pierced ears to wear earrings. Skin piercing fell out of fashion in the early 1900s. By the 1940s, it was not uncommon for women to have their ears pierced.

All that changed thanks to Queen Elizabeth II. In 1947, she received a pair of diamond earrings as a wedding present and earrings to wear them. After that, the popularity of pierced ears increased and now even children often get their ears pierced.

Earrings are usually attached to the earlobe through a piercing, but can also be attached to other parts of the ear. They come in a variety of designs such as studs, drops, hoops, necklaces, bars, ear strings, ear studs and huggable earrings.

Ear cuffs

Cuffs are earrings that are worn above the ear rather than on the ear. The ear cuff is attached to the outer edge of the ear and can also be attached to the ear through a piercing in the lobe. Ear cuffs can be made in simple and very complex designs.
